6. To raise awareness regarding safe guarding their intellectual property.

**Report:**

Principal Dr. Manjusha Kulkarni facilitated this lecture by Dr.A.A.Thakur an alumnus of this college for the Intellectual Property Rights. They chose the seminar hall as the venue. The event started with the great introduction of Dr.Thakur sir and their past achievements.

In his talk he discussed about Intellectual property, need and ways to safe guard it. He provided numerous everyday instances of trademarks copy right and patents. He urged the students to uncover and protect their creative ideas, through means of Patents, Trademarks or copyright. Intellectual property (IP) refers to creations of the mind, such as inventions; literary and artistic works; designs; and symbols, names and images used in commerce.

IP is protected in law by, for example, patents, copyright and trademarks, which enable people to earn recognition or financial benefit from what they invent or create. By striking the right balance between the interests of innovators and the wider public interest, the IP system aims to foster an environment in which creativity and innovation can flourish.

A patent is an exclusive right granted for an invention. Generally speaking, a patent provides the patent owner with the right to decide how - or whether - the invention can be used by others. In exchange for this right, the patent owner makes technical information about the invention publicly available in the published patent document.

Copyright is a legal term used to describe the rights that creators have over their literary and artistic works. Works covered by copyright range from books, music, paintings, sculpture and films, to computer programs, databases, advertisements, maps and technical drawings.

Such sessions help calm down the students and introduce them to a whole lot of opportunities and we were all grateful to the Principal, Dr. Manjusha Kulkarni, and all the teaching staff members who were an equal part in organizing and making this event a success.
